

Stage 1 – Regular Water Restrictions

When the J-27 monitoring well is at 855 feet or higher, City of Uvalde residents are under Stage 1 water restrictions. This means we follow our regular conservation practices listed below.

- Don't waste water.
- Fix leaks quickly.
- Don't let water run off into the street.
- Water your yard before 10 a.m. and after 6 p.m. to prevent evaporation.
- Water with a hand-held hose anytime, but put a pistol grip or other device on your hose that will shut off the water when it is not being used.
- Water your trees any time of day with a hand-held hose, soaker hose, drip irrigation or bucket.
- Water your foundation at any time with a soaker hose to prevent settling.
- Wash your driveway or patio only to prevent health and safety issues or if you are preparing to paint.
- Wash your car on the grass to prevent run off.
- Children's water toys, pools and water slides can be used anytime on the grass.

Let's all be water smart so we stay at Stage 1.
